### **CALL FOR PAPERS**

Due to world trade liberalization and global logistics operation, world cargo volume has been increasing in an unprecedented fashion for the past several decades. This exceptional growth path has led to tremendous challenges to logistics professionals. With the development of information and communication technology and the support of data-driven and optimization-based decision making, intelligent logistics plays a crucial role in managing global supply chains.

As an excellent platform to facilitate the interaction among the logistics professionals, T-LOG 2016 will be hosted by National Chiao Tung University in Hsinchu, a city known as the Silicon Valley in Taiwan. The conference will serve as a great opportunity for both academics and practitioners to exchange their information and knowledge as well as to work on the issues and problems related to transportation and logistics.
