

enhanced a feasibility for low carbon city in medium-sized City under a clear road map

ACKNOWLEDGMENT

This study is granted by the Japan Ministry of Environment "Global Environment Research Fund (S-6)."

We would like to express our gratitude to Dr. Bounta ONNAVONG, the director of Division of Planning and Budgeting, Ministry of Public Works and Transport of Laos who kindly facilitated us during the field surveys in Vientiane, and Dr. Amphone VONGVIXAY, lecturer of the National University of Laos, and her students for helping with the SP survey. Finally, we would like to thank Dr. Thaned Satiennam and his students for kindly helping us to develop the discrete choice model.
