

introduced. It is unlikely that the full benefits of this are represented here. Traffic congestion, particularly during the peak period in the CBD was noted and a further study is required to determine the impact of the newly introduced priority lanes.

Finally the study has also shown that there is a need to refine the timetables especially limited stop bus time tables.

## 7. ACKNOWLEDGEMENTS

The authors would like to thank the Department of Planning Transport and Infrastructure, especially Dr. Frank Primerano the Senior Transport Analyst, for providing the data for this study.
